Subject: 6726 Greenwood ave 98103 4 story apartment building
Date: Monday, August 01, 2016 11:13:39 PM

To the city planners and building department..

This proposal for a 4 story building. with 55 POD APARTMENTS WHICH ARE NOT APARTMENTS BUT COLLEGE DORM ROOMS. WITHOUT PARKING, WITHOUT A LAUNDRY ROOM ARE NOT AFFORDABLE HOUSING IF THEY WILL COST \$800-\$1000 A MONTH. There is nothing positive for anyone except the developers who will profit as usual from this development while the residents of our neighborhood will suffer. How can 55 units take the place of the original 2 single family lots equaling 8000 sq feet.

There is already little parking and a building with 55 tiny rooms will create more garbage and bring in transient people. Who in the building department has approved this building without a laundry room on premise for the residents? The closest laundromat is on 8th/ 65 st in Ballard.

The invention of pod apartments is lowering the living standard for ordinary folk who are struggling to survive. ...Most people want to go home after work or school to a comfortable living space with a kitchen, bedroom,bathroom and small den.

This big box will impact all of the single family houses close by.

There is absolutely no one benefiting from this building except as usual the developers. They have already ruined Ballard,Downtown and now they are going to destroy one of the nicest areas in Seattle. this must be stopped. I thought the government represents the people not the developers. or are they paying your salaries now.

Even low income folk deserve a better living space then 250 sq ft.
