---

Hello,

I am writing about project 3020114 (Greenwood Apartments with no parking). I am a 17 year home owner in the phinney ridge neighborhood (204 N 62nd Street). It is my understanding that this building will not provide parking for its residents. I do not like this trend of buildings without parking, especially in neighborhoods with no light rail or any plans for light rail. The #5 bus is very full during rush hour, and the parking is already tight in this neighborhood. It's just not realistic that none of the people or even a majority of the people will not own cars, making parking more difficult for home owners nearby. This is unfair for individuals who have invested in this neighborhood.

This type of building seems more appropriate along a light rail route, not within an established neighborhood. You need to re consider moving forward on this project.

Regards,  
Chuck Miller
