Subject: Master Use Project #3020114

I am writing to express my opposition to Master Use Project #3020114 (slated for 6726 Greenwood Ave. North, Seattle) as it is presently constituted.

Specifically, I oppose the construction of a 55-unit residential project with no provision for parking. Parking in this area (I live within 3 blocks) is extremely constrained as it is forcing an additional 55 vehicles onto nearby streets will only make matters worse. And this assumes only one vehicle per unit, an unlikely situation.

I suspect this is an effort by the developer to avoid the cost of adding parking to the project. I suspect this also is sanctioned by the city in an effort to make owning a vehicle so onerous that residents will decide not to have one. This is social engineering at its worse.

I should also note that the comment period should be extended to June 30 because the current comment period was inadequate. Although the sign announcing the project went up weeks ago, the comment due date was filled in only last week. I know, I walk by this site on a near daily basis.
