Dear Magda and Shelley -

Shannon and I would like to thank you on behalf of Save Madison Valley for first meeting with us to help us prepare for the meeting tonight, and also for facilitating our having a time slot to speak. We really appreciate being able to present our concerns to the board, and how responsive they were, and you were also.

We want to be sure as you move ahead with some of the concerns raised during the design review meeting tonight, that you know we have submitted a report from an urban ecologist who has identified at least one exceptional tree, and possibly more. There is also still an open question of whether the grove is exceptional.

The question of how the height allowance was calculated was also raised tonight. We noticed in an email that you wrote, Magda, that you asked for a site survey to be submitted that was legible. The current survey is too blurry to be used. We've run into the same problem, and will look forward to having access to a legible survey. Will that appear on the Department's website? Or should we look somewhere else?

Thank you again.

Melissa Stoker
