Dear Design Review Board,

The developer made several changes to the back side of the building to accommodate the transition to the single family zone. I would like the board to approve the building design so the developer can move forward with the project. Following are some of the benefits I see for our community.

BENEFITS

Greater setbacks from EDG #1

- Developer and architect have heard the DRB and community and set back the façade an additional 5-10 feet along Dewey since EDG #1
- Building has a clear front and back – sensitivity to SF homes along Dewey is apparent, while front of building will create new inviting pedestrian space along Madison

Considerably more tree/landscaping from EDG #1

- The Developer also heard the DRB's comments that landscaping be as dense as possible
- In response, this design shows a greater variety of larger trees and overall lush landscaping

Green screen wall and finish on Dewey side of building from EDG #1

- The Developer has heard the community and DRB in their concerns about the back side of the parking structure, and has improved the design to include a green screen wall
- This creates a cohesive feel to the building, while simultaneously softening the back side for existing Dewey residents

Outreach on this project is extensive

- Developer is clearly demonstrating neighborliness with outreach program
- From the beginning, the team has been very open to feedback and meeting
- The Designer and Developer have met with project opponents on three separate occasions
- They have also met with the Community Council, the Merchants Association and the neighborhood P-Patch gardeners and P-Patch administrators at the city
- The Developer organized a joint community meeting with the community council to show early design concepts and answer questions and address concerns; more than 200 attended

Much-needed housing

- Madison Valley is a wonderful neighborhood and many people want to live there, but perhaps not in a SF home
- 75 units of housing – much of it multiple bedroom – will help meet this demand and allow us to welcome more neighbors to our community

Wonderful to have a local cooperative grocer in the neighborhood

- Many of us in the community are extremely excited to welcome a local cooperative grocer like PCC and have long envisioned a grocery store as key to our business district

- It's telling that the Developer has worked to bring PCC into the fold so early in the development process, ensuring a high-quality product for this area
- I can't wait to shop at a local grocer instead of driving to the Central District, Capitol Hill, or Madison Park

Safe, appropriately lighted pedestrian right of way on front and back side

- The improvements the development will make to both the front and back of the building will widen sidewalks and improve pedestrian safety by creating quality places for people to walk
- Pedestrian-scale lighting will invite neighbors to and from the P-Patch as well as guide them along our wonderful business district

Strong, long term local neighbor for the business district

- Many of us have desired a grocery store in this neighborhood for years
- PCC will be a draw that benefits our other fantastic business by producing a spillover effect and encouraging shopping and strolling along Madison
- 75 new apartments will result in more customers for all of our Madison Valley businesses
- An additional small commercial space will be available for lease to a small business owner

Delay on the project only means the land sits empty for longer

- City People's is moving out at the end of the year
- A vacant space in the middle of our business district could be an eyesore and attract nefarious activity
- It's time to move forward on this project

Kind Regards,

Brett Faulds
