Please see comments below from Francie Rutherford (frutherford@comcast.net)

I have great concerns about the developmental proposal for the City People's site in Madison Valley. I feel that this project does not take into account current neighbors, it is disregarding the environmental impact (by not preserving the tree canopy) and the proposed building is overbuilt for the size of the property . I am greatly distressed about what this will mean for traffic. I live in an adjoining neighborhood and pass through this area on my way to work. The increased traffic will increase stress for all of us who use this corridor. This project has a very negative impact on the Madison Valley neighbor's quality of life.

Sincerely,

Francie Rutherford
