Hello,

I am writing in support of the proposed building, project 3020338.

Our city is growing rapidly and I think it's great to see the neighborhood grow with it. It's clear to me the the architect team put a lot of thought into creating a building that not only would fit into the area aesthetically, but would also serve more than one important function. I especially appreciate the much improved pedestrian experience along Madison. It will be great to have wider sidewalks and new landscaping.

I'm excited to see that the team brought in a local business to the retail space and included housing above. In this housing market, I know that we need to build more units so that everyone can continue to live here. I heard there are two bedroom apartments which is fantastic and means that more families can move to our neighborhood.

It's clear to me that, after coming to present to the community and going through the DRB process, the project team really listened to the concerns they heard. I appreciate the set backs on the building and their efforts to soften the back side of the project along Dewey.

Honestly, I think this is exactly the type of project we need to see more of in Seattle. More housing, improved pedestrian experience, a local business tenant and good design on top of it all. I hope that you will approve the project to move forward.

Thank you

-Aaron Vetter
