Subject: (ShapingSeattle) Comment about Project 3020338
Date: Wednesday, October 26, 2016 4:12:13 PM

I can't attend the meeting this evening, but as a resident of Madison Valley I wanted to voice my support for this project. A mixed use building near transit is the type of growth embodied in the City's recent comp plan. It's a well designed building on a challenging site. I believe the changes to the proposal respond directly to the boards earlier comments by increasing set backs, preserving more trees, and providing more vegetation for screening. I hope the board approves this design and that I see this building in my neighborhood soon.

Thanks, Erik Rundell
