Concerning Project 3020338 on 29th and Madison

I'd like to express my support for this project.

I have been present at all of the Early Review meetings and I believe the architect and developer have done an outstanding job listening to the community, incorporating public comment and ultimately designing a building which will be a welcome addition to a neighborhood lacking in forward thinking design and housing in general. The majority of my neighbors agree and while I understand there has been some vocal opposition to this project, there are many of us who believe in development to accommodate the population increase and the thoughtful use of property to further the growth in Seattle. We're ready for this project to move forward. It's taken way too long to get off the ground.

Sincerely,
Jeff Scott – 815 29th Ave East
