Subject: comment on project # 3020338

Seattle Department of Construction & Inspections
May 24, 2017

I'm writing in support of granting a permit to this project. While I understand the desire to preserve urban tree cover, and though I would like to see fewer mandatory parking spots in all new Seattle apartment projects, I see no reason to oppose this project. If in fact a new grocery store will occupy the proposed development, this will benefit the neighborhood.

In order to address the severe affordability crisis in Seattle, this city needs to build a substantial quantity of housing in the city, including market rate homes, condominiums, and apartments, as well as subsidized housing funded by mandatory inclusionary zoning requirements.

Sincerely,
Andrew Engelson
227 31st Ave E.
