---

good day

i fully support the ongoing review process and as a long term neighbor i am very concerned with the project on many levels.

most outstanding for me is the traffic related issues and i strongly support an exhaustive and accurate review of the implications of this project on the traffic of madison but also of the surrounding neighborhoods. if the traffic does indeed deteriorate considerably due to this project we will feel the pain for many decades to come, if not permanently.

thank you for your efforts.
