Comments: I completely support the new project as presented to the City of Seattle for construction of a new 6 Story/82 Unit, mixed use building. I think it will greatly benefit the neighborhood long term based on job opportunities, reduction of travel necessary to buy household essentials, etc. The current building and corresponding business unfortunately, does not maximize the locations potential and will not provide the necessary benefits as the new project. In addition, the current aesthetic view of the hillside and building is very poor. The folks fighting the propose project I believe to be the small minority. I own three (3) houses immediately impacted by the project and I support it.
