Appeal Details

Hearing Type: Mitigation

Contest Reason:

We had the permit submitted online and were waiting for further correction notices. During the holidays several of our principles were out of town and out of the county for up to 3 weeks and were unable to monitor the status of this permit. We have every intent to have this permit in place. There has also been some difficulty in navigating the system and understanding what further information is needed. As to the equipment in the ROW during the inspection we also have every intent to follow the guidelines but it is difficult to monitor every move our sub-contractors make during the work day. We have communicated the rules and procedures to our sub-contractors and expect them to follow these rules going forward. We would like to request a reduction in the violation fees.
