RE: Project #6463943
Project#3020114

Dear Planners,

I was horrified to learn that there is a building planned for the area of 6726 Greenwood Ave N. that has 60 units and no provided parking. While I realize the chances of downsizing the building are slim to none, the delusion that the numerous occupants will somehow magically not own cars will be very damaging to our neighborhood. Parking is already tight on Greenwood Ave N. and an additional 60 plus cars is going to make it untenable. Based on traffic on the neighborhood email sites, there is no support for this approach. Please require at least one parking stall per unit. Also if you would keep me informed as to how to proceed further in contesting this terrible plan. The idea that because people live in a small space, they somehow will cease to drive is amazing and delusional.

Sincerely,

Lachlan E. Cooke
