Corrections

1. Please note that the Master Use Permit for this project is #3033991.
2. Page 5: Commercial uses (both existing and proposed) at this site were assumed to have an auto mode split of 45%. This seems high, given both the location (downtown) and the uses (probably drawing primarily from the local area). Please provide supporting documentation for this percentage, or consider using a lower percentage.
3. Please provide information regarding truck trips generated by the project, including move-in/move-out, solid waste, delivery, and other trips. Identify the expected frequency and times of day of these trips, and the extent to which they are likely to overlap. What impact to the alley and adjacent street network are these trips likely to have?
